**SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD**

- ZONE A** No base flood elevations determined.
- ZONE AE** Base flood elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet usually area of ponding; base flood elevations determined.
- ZONE AO** Flood depths of 1 to 3 feet usually, less than on flanking terrain; No depths are shown on this map.
- ZONE A99** To be protected from 99-year flood by Federal flood protection system under construction; no base flood elevations determined.
- ZONE V** Coastal flood with velocity hazard (wave action); no base flood elevations determined.
- ZONE VE** Coastal flood with velocity hazard (wave action); base flood elevations determined.

**FLOODWAY AREAS IN ZONE AE**

- ZONE X** Areas of 50-year flood areas of 100-year flood with average depth of less than 1 foot or with drainage areas less than 1 square mile and area protected by levees from 100-year flood.

**OTHER FLOOD AREAS**

- ZONE X** Areas determined to be outside 99-year flood plain.
- ZONE D** Areas in which flood hazards are undetermined.

**NOTES**

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding. Certain areas of the State - sources of small size, or all planimeters features outside Special Flood Hazard Areas - may be omitted. The community map preparer should be consulted for possible updates. Flood hazard information prior to use of this map for property purchase or other major purposes.

Coastal flood elevations apply with lands of 100-year flood and include the effects of wave action; these elevations may differ slightly from those shown on the National Weather Service for hurricane evacuation planning. Areas of special flood hazard 99-year flood include Zones A, AE, AH, AO, A99, V, and VE.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Flowing areas of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydrologic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Floodway widths are provided in the Flood Insurance Study Report.

For all captions of elevation reference marks - see map number 225199-0145.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For community map revision history, prior to countywide mapping, see section 6.0 of the Flood Insurance Study Report.
